

NAMIT MAHAJAN

Senior Full Stack Developer | React.js & Node.js Specialist | AI-Assisted Development Expert

Gurugram, HR • namitmahajan11@gmail.com • linkedin.com/in/namit-mahajan-2106

PROFESSIONAL SUMMARY

Results-driven Senior Full Stack Developer with 8+ years of progressive experience architecting and delivering high-performance web applications at scale. Proven expertise in React.js, Node.js, and TypeScript-based systems processing millions of transactions daily. Specializing in AI-assisted development using Claude Code and GitHub Copilot to accelerate feature delivery by 40%. Demonstrated track record leading cross-functional teams, optimizing application performance (30%+ improvements), and implementing scalable microservices architectures. Skilled in translating complex business requirements into elegant, maintainable code.

CORE TECHNICAL SKILLS

Frontend:

React.js • Next.js • TypeScript • JavaScript • HTML5 • CSS3 • Redux • Context API • Component Architecture • Responsive Design • Accessibility (A11y WCAG 2.1)

Backend & Architecture:

Node.js • Express • Microservices • System Design • PostgreSQL • MySQL • MongoDB • REST APIs • GraphQL • AWS • CI/CD (GitLab, Jenkins, GitHub Actions)

Performance & Quality:

Web Vitals • Lighthouse Optimization • Bundle Size Reduction • Jest • React Testing Library • TDD • E2E Testing • Webpack • Performance Profiling

AI & Modern Development:

Claude Code • GitHub Copilot • Prompt Engineering • AI-Enhanced Testing • VS Code AI Agents

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions • Gurugram, India

Senior Associate | Full Stack Developer

May 23, 2025 – Present

Macy's Project — Chatbot Integration

Developed and integrated an AI-powered chatbot into the live Macy's e-commerce platform using React, enabling real-time customer engagement through the site's chat interface.

- Built chatbot UI components in React with dynamic message rendering and conversational flow handling
- Integrated WebSocket connections for real-time chat functionality, supporting smooth performance under high concurrent traffic with sub-second response times
- Collaborated with backend and product teams to refine chatbot behavior; reduced average query resolution time by 25% through improved intent handling
- Explored GraphQL integration on the frontend for optimized data fetching in select chatbot components

AMEX Project — Angular to React Migration

Currently leading the migration of a legacy Angular application to a modern React architecture using the one-app micro-frontend framework, working from client location.

- Designing micro-frontend architecture using one-app framework, enabling independent module deployment across teams
- Migrating Angular components to React, improving performance and maintainability of the application
- Setting up automated CI/CD pipeline for micro-frontend deployments to streamline release cycles
- Leveraging Claude Code and GitHub Copilot as AI coding agents for component generation and automated testing, reducing feature delivery time by 35%

- Utilizing AWS basics for deployment support and GitHub Actions for CI/CD workflows alongside the existing pipeline

Espire Infolabs • Gurugram, India

Full Stack Engineer

January 2025 – May 2025

Contributed to frontend development for an education platform using React, before transitioning to a new opportunity as the project timeline was impacted by client-side budget constraints.

T-Systems • India

Senior Frontend Developer (Team Lead)

October 2022 – December 2024

Led frontend architecture for a Cloud Migration Platform, building dynamic, API-driven dashboards with real-time updates.

- Developed multiple Proof of Concepts (POCs) evaluating React, Next.js, and Vue.js to guide platform modernization decisions
- Architected a micro-frontend framework using code-splitting and lazy loading to improve load times and maintainability
- Managed the frontend team, conducting code reviews and establishing consistent architectural and design standards
- Integrated REST APIs with robust error handling and caching strategies to support dashboard functionality
- Worked with AWS fundamentals to support cloud infrastructure needs for the migration platform

Cognizant Technology Solutions • India

Frontend Developer

August 2021 – July 2022

Developed foundational e-commerce modules for Titan's retail platform, implementing Redux state management for complex shopping workflows.

- Built a scalable component library with PropTypes validation and Storybook documentation to speed up feature development
- Established CI/CD pipelines using GitLab, automating testing and reducing manual deployment effort

Wipro Limited • India

Project Engineer (Frontend Developer)

June 2018 – August 2021

Contributed to multiple concurrent client projects, developing responsive, accessible web applications using HTML5, CSS3, JavaScript, and React.

- Implemented responsive design patterns using CSS Grid and Flexbox for consistent cross-device experiences
- Extended CSS capabilities using SASS/SCSS, building variable systems and mixin libraries to reduce stylesheet complexity

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)

Guru Nanak Dev University, India • Graduated: May 2018

Claude 101 Course • Anthropic | Claude Code 101 • Anthropic | React Advanced Patterns • Frontend Masters | TypeScript Deep Dive • Total TypeScript | Jest Testing Framework Mastery
